

# Zone of Control Containers (ZOC Boxes)

**Product Data**  
Model - ZOC

## Description

Advanced Programs, Inc. Zone of Control containers are designed to be used with API's TEMPEST equipment to provide additional electric/plane wave attenuation and power line isolation. Light in weight and small in footprint, these containers can be used in higher risk situations where a larger shielded enclosure cannot be used.

- Small Client - Supports API TEMPEST Thin Clients
- Display - accommodates the API 17- inch TEMPEST LCD panel (analog)
- Server - accommodates Rack Mount 6 and also accommodates additional equipment (e.g., LAN Switches, Routers, Disk arrays, UPS, etc.)
- Scanner - accommodates the API TEMPEST 1200 dpi Color Scanner.

The containers are designed with doors that allow for ease of access in normal, everyday usage. They are also designed to facilitate installation and service of the installed equipment. Very little maintenance is required to maintain the additional attenuation that these containers provide. In addition, an improved TEMPEST keyboard is offered that provides additional electric/plane wave attenuation while maintaining the keyboard's ergonomic characteristics. Information on the attenuation and power line isolation characteristics of these containers can be obtained from your API Account Manager.

**Server**  
63.0"H x 24"W x 36"D  
403 lbs. (crated)

**Scanner**  
12.8"H x 20.0"W x 29.0"D  
37.5 lbs.

**Display**  
18"H x 17W x 3.0"D  
17 lbs.

**Small Form Factor**  
4.8" x 17.5" W x 22.0"D  
12 lbs.

Advanced Programs, Inc. is an NSA-endorsed test services facility and an NSA-endorsed TEMPEST manufacturing facility. Technical Specifications are subject to change without notice. U.S.A. export controls apply to these products.
